SnapPay™ From Fiserv

SnapPay Integrated Payments for SAP®

fiserv.

Key Benefits

- Cloud-based ERP and payments processing with SAP and SnapPay
- Seamless integration directly with SAP ECC and S/4HANA
- Real-time access to SAP data
- Flexible migration path
- Pre-integrated and fast implementation
- Reduced PCI footprint by accepting credit card payments for sales orders over a secure device
- Order to cash coverage
- Integrated portal for customer self-support
- Easy administration and configuration of customers and data
- Tokenized credit cards for increased security
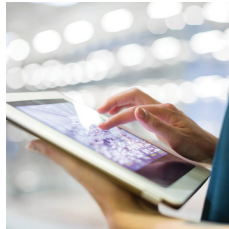

Digitally transform your payment process with certified SAP integration to improve working capital and increase efficiencies. SnapPay from Fiserv, integrates with SAP ERP solutions to serve the holistic B2B payment needs of enterprise-size businesses.

"Snap" to SAP ECC, S/4HANA and Digital Payments Add-On

Imagine putting your accounts receivable (AR) and accounts payable (AP) on cruise control with your SAP ERP back end being the single source of truth. We can increase the return on your SAP investment by solving your payment needs holistically.

SnapPay is a cloud-based AR and AP solution with native integration to SAP (ECC and S/4HANA). This means true touchless to payment to reconciliation, across multiple payment types and channels.

Get Paid Faster, Digitally

Our goal is to help you optimize working capital by getting paid faster and taking full advantage of early supplier payments. We have a proven track record of reducing day sales outstanding (DSO) and unapplied cash. Additionally, we free up your resources from routine inquiries by encouraging online transparent collaboration between buyers and suppliers. What would you do with the extra hours?

Modular and Highly Configurable

SnapPay, our modular solution is highly configurable to address your needs:

- Single platform for AR and AP
- eCommerce payment integration
- Electronic Invoice Presentment and Payment (EIPP)
- Invoice print and mail services (U.S.)
- Secure credit card acceptance
- AI-driven, integrated receivables

SAP integration advantage

- **Data Security:** Many B2B payment solutions still require the AR team to run extracts from ERP and send files through secure file transfers. Not SnapPay. SnapPay's native SAP agent and rest APIs securely expose relevant data to the online portal. You have full control of what, when and how to share

- **Fast Implementation:** Native integration means you get fast implementation with limited tech lift. You can go live in as little as two weeks

- **Intuitive Administration:** SnapPay's user-friendly onboarding portal enrolls new users through self-service. User security is integrated directly with SAP and tied to customer records

- **Future Proof:** We fully support the client's ERP migration path. SnapPay is compatible with SAP ECC and S4/HANA

- **Seamless Transition:** Whether you currently use in-house or third-party solutions, SnapPay can re-encrypt existing card on file/stored payment methods to minimize customer re-enrollment

- **PCI-Friendly:** Reduce your PCI scope with encrypted keypads, hosted payment forms and tokenization. SnapPay helps you mitigate the risk of a cardholder data breach by keeping card data completely away from your technology environment

- **Hybris eCommerce:** Integrated to SAP Digital Payments Add-on, SnapPay seamlessly supports payments in the eCommerce channel and closes the loop with automatic ERP order-to-cash workflow

Partner to Innovate

As an SAP PartnerEdge solution partner, we are constantly collaborating to deliver innovative solutions. Through our integrated solutions, you can take full advantage of all that Fiserv and SAP offer.

Fiserv is driving innovation in Payments, Processing Services, Risk & Compliance, Customer & Channel Management and Insights & Optimization. Our solutions help clients deliver financial services at the speed of life to enhance the way people live and work today. Visit fiserv.com to learn more.
